

Analysis of Exploitation Risks

✓ TRL 3 or more

✓ After month 12

The service will support partners to identify risks and potential obstacles to the future exploitation of project's results and tackle questions like:

Which exploitable results do the project partners aim to generate?

What form(s) can the exploitation of these results take? How to enable it?

What is each partner contribution to the project, what are their different exploitation strategies, are the expectations of partners compatible and coherent?

Benefits:

Exploitable results described and characterised

Map of risks

A set of recommendations to better address exploitation during project life and after

<http://exploitation.meta-group.com>

After confirmation by the EC Project officer, apply to:

EC-CSC-Exploitation-support@ec.europa.eu

All FP7 and H2020 projects are eligible to apply

1

A project can benefit only once

Projects can ask for the service only if they have not already benefitted by a similar one under another support scheme
